

Developers Studio

Associate Product Developer

(no experience required)

About Developers Studio

Developers Studio is a Blockchain-based company that aims to deliver superior solutions to its top-tier customers under the umbrella of Blockchain, Fintech, and AI/ML technology. We also offer individuals a variety of career development paths that enable them to contribute to our company goals as well as their professional development. Our team is seeking highly motivated and talented individuals who are passionate about technology.

We onboarded a training batch last year and had a great experience with them. We had vacancies for 30 resources; out of 600 applications, we shortlisted the candidates. And now almost all of those resources are working in good organizations. For the ones who completed the entire session with DS, we offered them jobs right away.

Qualities you should have

- Strong communication skills; written and presentation
- Strong research and problem-solving skills
- Critical thinking
- Understanding of user behavior, and journeys
- Have some technical background, basic knowledge of how the software operates and being developed
- Always curious to know more and dig into the details

What you'll be doing

- You will be doing market research on various dimensions
- Figuring out the areas of improvement, along with the solution, plan of execution
- Creating initial user stories, flowcharts, and wireframes
- Designing presentations for stakeholders and also presenting them

What you'll get

- Market Competitive Salary
- Our Perks and Benefits
- A chance to work on the innovative products which have a huge user base
- You will get to know what wonders can be done and what impact can be created by combining Blockchain, AI/ML, and Fintech
- You will gain experience of the project life cycle from the Ideation phase to end
- You will come to the dynamics of different regions of the world, their local trends, markets, user behavior, etc

Hands-on experience with

- MS Office (Word, Excel, PowerPoint)
- Any UI/UX tool (Figma, Sketch, XD, etc)
- We'll train you on the rest of the requirements
